

Digital Mailroom Solution

DIGITAL MAILROOM SOLUTION BENEFITS:

- ✓ Digitize your mail with ease
- ✓ Provide instant recipient notification of incoming mail
- ✓ Distribute your mail quickly and securely (multiple recipients and locations)
- ✓ Reduce the risk of lost mail
- ✓ Initiate faster business transaction processing
- ✓ Streamline end user self-registration of mail into EDRMS
- ✓ Automatically initiate EDRMS workflow on mail
- ✓ Align business processes with governance, regulatory and digitization standards.

Take the hard work out of digitizing and distributing your physical mail with EzeScan's Digital Mailroom Solution.

Many businesses struggle with processing and distributing incoming correspondence. Much of this mail is time sensitive and critical to the business. Physical distribution of mail can be time-consuming and prone to errors, with mail being sent to wrong recipients, lost or forgotten, or filed incorrectly. Lack of immediate visibility may result in an organization not responding to an urgent matter quickly enough. EzeScan's Digital Mailroom Solution can help you digitize and action your mail faster!

DIGITIZE YOUR MAIL WITH EASE

With EzeScan and a high-speed TWAIN/ISIS compliant scanner or MFD, your mailroom staff can quickly digitize incoming mail. The user interface makes it easy for an operator to capture relevant metadata and easily distribute to the right person or workflow. EzeScan's digital mailroom solution creates a digital trail of incoming mail so your critical information is not lost or forgotten.

DISTRIBUTE TO YOUR STAFF QUICKLY & SECURELY

EzeScan's Digital Mailroom solution eliminates the delays with physical mail distribution to get your information to the correct people faster. Distribution workflows can be selected to allow automated email notification and distribution. End users or business units can view, action and register their mail in EzeScan's Remote Indexing WebApp on any device from any location. EzeScan also helps to meet your governance, regulatory and digitization requirements.

EFFORTLESSLY REGISTER INTO YOUR EDRMS

Automated business intelligence ensures your documents are named and filed correctly into your EDRMS if required. Automatically initiate EDRMS record actions or workflows. EzeScan supports integration with over 40 popular EDRM systems.

HOW IT WORKS

GENERAL MAILROOM WORKFLOW

Hard copy mail enters the business via the mailroom and is scanned using EzeScan Desktop Software

EzeScan captures relevant metadata with operator validation and distributes digitised mail to recipient via EzeScan Web Application

Recipient receives email notification. Users can review mail, self-register and initiate business process from any device.

EzeScan uploads to supported storage destination. Users can review mail from supported storage destination

SECURE MAIL WORKFLOW

Envelopes marked "private or confidential" are scanned using EzeScan Desktop Software

EzeScan captures relevant metadata with operator validation and distributes digitised copy to recipient via EzeScan Web Application

Recipient advises on secure mail
 - Open, scan and send
 - Do Not Open, deliver physical mail
 - Junk mail, discard

If mail is advised NOT to be opened, the hard copy envelope is physically delivered

If mail is advised to be opened, it is sent to the general mailroom workflow above
