

M-Files Integration - Enterprise Capture Automation

INTEGRATION BENEFITS:

- ✓ Effortlessly capture business-critical information from both hard copy and digital born documents and put it to use faster.
- ✓ Capture solutions for:
 - Digital Mailroom
 - Back Scanning Projects
 - Workgroup capture via MFP
 - Invoice Processing.
- ✓ EzeScan CLOUD provides fast deployment with an affordable monthly subscription.
- ✓ Use inbuilt lookup functionality to speed up your document registration.
- ✓ Auto filing into M-Files Vaults using barcodes.
- ✓ Utilize EzeScan's "Quick Redact" feature for automatic black out of selected text or zones.
- ✓ Append or prepend pages to existing M-Files records.
- ✓ Ability to add a new value to an existing object type. e. g. new customer/vendor.
- ✓ Achieve digitization records management compliance with out of the box PDF/A support.

Take the hard work out of your capture with EzeScan!

With advanced power indexing features and native integration with M-Files, EzeScan delivers the fastest most cost effective method to capture and register both your hard copy and electronic documents directly into M-Files. Reduce the amount of time physically handling and processing your documents across your organization by automating your manual business processes into highly intelligent digital workflows. EzeScan CLOUD provides an option for fast deployment with an affordable monthly subscription, without the software, hardware or management headaches.

EFFORTLESSLY CAPTURE YOUR DOCUMENTS

EzeScan's professional production batch capture capabilities allow you to batch capture documents from multiple locations including document scanners, MFP's, network folders, email mailboxes or digital process workflows. EzeScan's power indexing capabilities guide the operator through the registration process via preconfigured drop-down menus. Where possible data is captured automatically, and real time validation ensures your data is accurate. Common data can be set for reuse across multiple documents to limit the number of keystrokes or eliminate them altogether.

AUTOMATE YOUR MANUAL WORKFLOWS

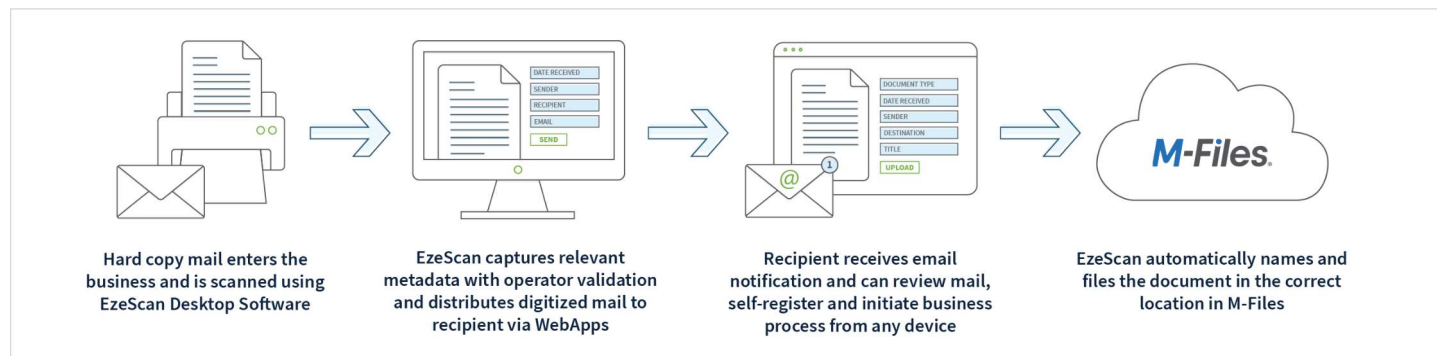

With EzeScan software solutions you can transform and automate your manual business processes into intelligent digital workflows. Get your information to where it needs to be with the minimum of effort. EzeScan's CLOUD capture solution is available to everyone in your organization regardless of their location via an intuitive WebApp interface. Your documents will be correctly named, distributed, filed, and uploaded to the correct location in M-Files every time. EzeScan's CLOUD Solution provides automated document capture, batch separation, metadata extraction, image enhancement, validation, file naming, folder creation and upload, limiting the need for any user intervention or excessive manual processing. By automatically initiating your M-Files workflows, EzeScan will ensure your information is actioned in a timely manner.

INTEGRATE WITH M-FILES

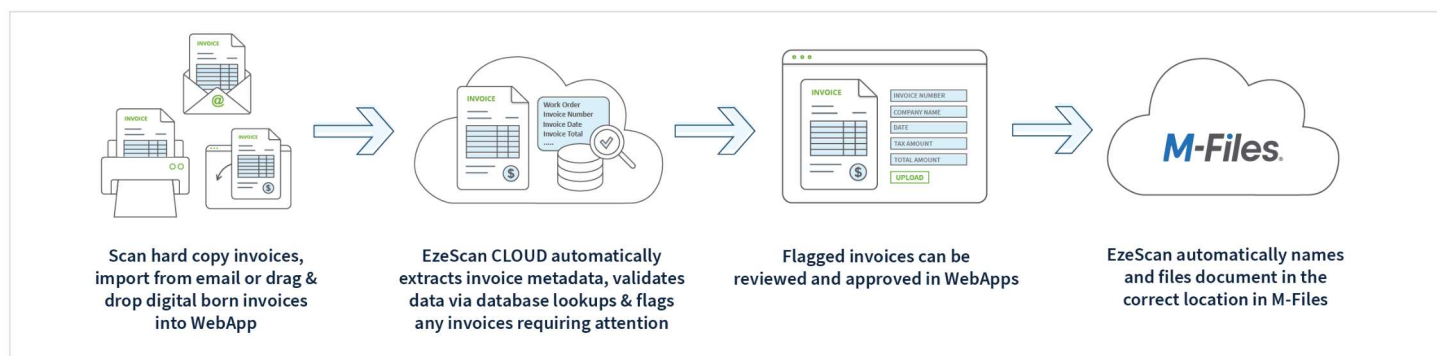

EzeScan provides 'out of the box' native integration with M-Files. This means a seamless experience for users when capturing and registering documents. With a highly configurable interface, EzeScan provides rapid deployment measured in days not months.
